mighty mountains Mosor and Kozjak. The city was fed by the world shortest river (Jadro) and had one of the best positioned harbors in Mediterranean sea. This strategic location combined with industrious inhabitants gave rise to a city of incomparable beauty six times larger than Paris during the first centuries AD. This was the birthplace of the Roman emperor Diocletian. (Visit 90 minutes)

Salona, treći grad po veličini unutar Starog rimskog carstva, smjestio se pod moćnim planinama Mosor i Kozjak. Grad je napajala najkratča rijeka na svijetu (Jadro), a njegova luka bila je među najbolje zaštićenim lukama uz Sredozemno more. Ovakva strateška lokacija u kombinaciji s radišnim žiteljima podarila je svijetu grad nevjerojatne ljepote, grad šest puta veći od Pariza tijekom prvih stoljeća nakon Krista. Bio je to rodni grad cara Dioklecijana. (Posjet 90 minuta)

Salona, the third largest city of the Ancient Roman world situated at the foot of a mighty mountains Mosor and Kozjak. The city was fed by the world shortest river (Jadro) and had one of the best positioned harbors in Mediterranean sea. This strategic location combined with industrious inhabitants gave rise to a city of incomparable beauty six times larger than Paris during the first centuries AD. This was the birthplace of the Roman emperor Diocletian. (Visit 90 minutes)

prisjetiti da su ovdje tražili zaklon naši pradavni preci. (Posjet 60 minutes)

Špilja Vranjaca nalazi se nekih dvadesetak kilometara od Splita. Planina Mosor pruža se prema Jadranskom moru sa svoje južne strane, dok sa sjeverne gleda na nizove paralelnih planina prema BIH. Špilja se nalazi na sjevernoj strani i lako ju je uočiti zbog širokog otvora (nekih 20m za 10m). Uči u ovo jedinstveno mjesto je zakoračiti u neku drugu, veličanstvenu stvarnost. Flora i fauna se mijenjaju, svjetlost postaje meka i prigušena, temperatura varira samo 5 stupnjeva tijekom godine, a posjetitelj je zaštićen od oštih vjetrova Dalmatinske zagore. Prizori koje posjetitelj susreće unutar špilje su nezaboravni. Pokušajte se

Cave Vranjaca is located some 20 km from Split. The mountain of Mosor has on the South side faces the Adriatic sea and on the North side rows of parallel mountains stretching towards Bosnia and Herzegovina. The cave is located on the north side, and is easily spotted due to the wide opening (some 20m by 10m wide). To enter this rarity is to step out of our world into the majestic underground reality. Flora and fauna change, lighting becomes soft, temperature varies just 5 degrees during the year, and the visitor is protected from harsh winds of the Dalmatian hinterland. Once inside the Cave the sights leave you in awe. Just remember that the first known humans took refuge here. (Visit 60 minutes)

pogled na grad Split, okolne otoke, zaljeve i luke upravo je s Kliske tvrđave. Trenutno se ovdje snima serijal 'Igra prijestolja' (Posjet 30 minuta)

Klis Fortress dominates the only natural passage from Dalmatian hinterland to the coastal plaines and cities. To hold this place is to secure our Miderterean paradise from intruders. Such was the fate of Klis Fortress during the Ottoman advances toward Europe. It mirrors the fate of Croatia as the last frontier of the Christian Europe to a marching Ottoman army. On this spot the fate of Europe was shaped. Bloody defeat of the Fortress guards in 1537. left Europeans in panic, but the city of Split stood strong with a newly build walls. While the strong Ottoman army was struggling to conquer this and other Croatian forts the West was secured. The best view to the city of Split, islands, bays and harbors is from here. Currently the filming of 'Games of thrones' takes place here (Visit 30 minutes)

Kastel Luksic, followed by visit to the Mills on Pantan – are located on a small river forming a miniature lake, surrounded by marshes, before it empties into the sea. This low land was partly used for agriculture during the history, and is constantly inhabited by a wide variety of bird species. Here we will have a lunch consisting of local food prepared according to traditional recipes. (Lunch break 90 minutes)

Posjet Školskom botaničkom vrtu OŠ Ostrog, Kaštel Lukšić. Slijedi posjet Mlinice Pantan (htiološko-ornitološki rezervat): smještene su na zapadnom dijelu Kaštelanskog zaljeva, neposredno blizu grada Trogira. Mlinice leže uz Riku koja ovdje stvara maleno jezero neposredno prije utoka u Kaštelanski zaljev. Tijekom povijesti ovo je močvarno zemljiste djelomično korišteno u poljoprivredne svrhe. Kontinuirano je naseljeno različitim vrstama ptica. Ovdje organiziramo ručak tijekom kojeg ćete imati priliku kušati tradicionalne recepte i domaću hranu. (Stanka za ručak 90 minuta)

Visit Botanical gardens of Ostrog school in
